A bit about me

I am a sophomore at the University of Utah in the computer science college. In my free time I do a lot of painting, playing guitar, going to the gym, and hanging out with my friends.

Code toolbox

- Android development
- Java
- C++
- HTML5 & CSS
- JavaScript
- Python

Certifications

While attending high school I became certified in: **HTML5, software development, software life cycles**, Photoshop, illustrator, and premiere pro.

Education

I graduated from corner canyon high school. While attending high school I was concurrently enrolled with Salt lake community college and Utah Valley University in four different programming courses. **Currently I am a sophomore CS major at the University of Utah.**

Experience

I have had a job since I was 14 and have been working ever since. I am currently working at Beans & Brews as a shift manager. **My last professional job was an I.T. internship position at Basic Research. I developed an app for android for SportsUSA** to help build a high school sports player database. I have experience using advanced algorithms, and building databases.

Awards

I was given the **most professional programmer award** by my concurrent enrollment program in high school. During that time I also competed in **SkillsUSA 2017 programming competition and placed in the top 10 in state**. Last but not least I am also an **eagle scout**.
